DIGITAL INFRARED THERMOMETER

The Lepu non-contact digital infrared thermometer is fitted with advanced German sensors displaying accurate temperature in only one second utilising blue light calibration technology. The device is CE certified meeting test standard: EN 61326-1:2013.

The device also allows two temperature measurement modes: Human body or object for multipurpose use and can record 99 sets of data which can be stored for tracking the changes of body temperature.

- Material: Pure copper probe
- Measuring Distance: 0-5cm
- Display: LCD Screen
- Weight: 95g
- Dimensions: 168.5*36*48mm
- Measurement range: 32-43C
- Power Supply: 2x AAA Batteries

STORAGE:

Store in a well-ventilated place.
Protect from Sunlight. Keep Cool.

Features:

- Three colored LCD Display screen which goes green when body temp is less than 37.4C, yellow when temp is between 37.5-38.5C and red when temp is greater than 38.6
- Blue light calibration technology to quickly measure body temperature with a one second screening time
- Non-Contact measurement to prevent cross infection - a person's temperature can be taken 5cm away to reduce the risk of cross infection.
- Portable and lightweight

Instructions:

1. Press the "switch" button and wait for the temperature measurement interface till you hear a beep
2. Place the little blue dot forehead thermometer within 5cm between eyebrows
3. Press the "switch" button to measure temperature
4. Measurement will show, the thermometer will automatically switch off without operation within 60 seconds
