# ECO-FRIENDLY BIN LINERS

- NON PLASTIC
- MADE FROM CORN STARCH
- 100% COMPOSTABLE

The Enviroplus range of compostable bin liners are the perfect alternative to traditional plastic bags. These liners are made from corn starch and other compostable material which naturally compost overtime.

These eco-friendly renewable bin liners are available in 30L, 80L, 120L and 240L bags for commercial use in schools, aged cares, kitchens, offices and washrooms.

All these bags are certified compostable to meet strict Australian, European and American standards.

Benefits of the Enviroplus Compostable Bin liners:

- Breathable and leak-proof for controlling odour and moisture
- Made from natural corn starch that is GMO free
- Ink made from raw materials which will break down and not harm the environment in the process
- Reduced landfill waste and carbon emissions
